

EVOSWITCH

WDC1

Located in Manassas, VA near Washington DC, our WDC1 data center is located in the heart of northern Virginia's technology corridor, often referred to as the 'epicenter of the internet'. It is conveniently located just half an hour west of Washington DC and 20 minutes from Dulles International Airport. The LEED Gold certified, DOD- and DCID compliant facility is home to a thriving ecosystem of connectivity and cloud service providers and enterprises, with direct connection to LINX NoVA, the first Internet Exchange in the world to receive Open-IX certification.

BUILDING

- + Two storey Tier III+ specification building with 22,000 m² / 235,000 ft² of customer floor space
- + Building management system

ECOSYSTEMS

- + IXroom
- + OpenCloud (Hybrid Cloud partner ecosystem)

POWER

- + MEP separated from the IT on the data floors

CERTIFICATIONS

- + ISO 27001:2013
- + ISO 9001:2008
- + PCI DSS
- + LEED Gold Certified

"It is easy to forget that what may be a day-to-day issue for us is a matter of online life and death to customers. We owe it to our customers to share our knowledge with them and leverage our ecosystems and our expertise in inter-connection and infrastructure to help them grow their businesses to the next level."

Jan Debrichy

Global Business Development Lead
